November 21, 2018

The Bellingham Public Library is a foundational element in the life and heart of our community, providing a rich array of services for all ages, interests, needs and demographics. The library's mission is to connect our community with each other and the world to read, learn, meet and discover. In service to this mission, Bellingham's library supports, welcomes and inspires lifelong learning, civic engagement, the development of future leaders, and access for all to materials, digital resources and skills.

Extensive planning during recent years is positioning the Bellingham Public Library and the City of Bellingham to meet these needs in the future. Recent examination of long-term financial needs and funding options underscored the city's commitment to the library. Library leaders have worked diligently to identify optimal levels of service to meet the increasing demands and expectations of Bellingham residents. Levels of service standards adopted by city and library leaders include: hours of operation; staffing to support access and branch operations; materials funding to maintain current and useful collections; and facility square footage to keep pace with a growing population. These and other planning initiatives are summarized in Section 1: Charter and Team.

This and previous studies have identified the limitations of the Central Library as a constraint to delivering on these commitments and meeting these standards. The Central Library in downtown Bellingham, serving as the largest branch library in Bellingham's system as well as the administrative and operations services center, is housed in an aging, 1950s building with many structural barriers to modern public library services. A 1985 renovation, while adding some square footage, provided no additional flexibility or support for the dynamic service models required of today's libraries. Key challenges posed by the Central Library as identified in recent studies and confirmed by our analysis include: a consolidated stacks structure in the middle of the primary service floor; services separated on multiple floors, lack of public restrooms on the main floor; floor loading limitations; lack of public collaboration and meeting spaces; and need for updated HVAC, lighting, fire alarm and sprinkler systems. These and other needs are examined in **Section 2: Existing Building Assessment**.

The primary purpose of this study was to further analyze the space constraints of the Central Library and propose flexible, cost effective options to remedy those constraints. Accordingly, this space planning study analyzed the implications of the adopted level of service standards to offer short-term strategies for improvements and provide options to increase flexibility for longer-term facility needs. Library needs and goals related to the constraints posed by the Central Library are presented in **Section 3: Program**.

The strategy outlined in **Section 4**: **Design Strategy** was generated in collaboration with the project team. It proposes a multi-segment approach to meet short-term needs that can be delivered in sequential phases or bundled into a larger single project. Highlights include repurposing the west end of the main floor to improve materials handling efficiency and consolidate staff areas, relocating the teen area to a larger and more visible space, constructing two additional meeting rooms, and opening up the central part of the main floor to create better access to collections. **Section 5**: **Cost Opinion** contains estimated costs for each of the plan component elements as well as summarizes the total endeavor. Background materials for the development of the Design Strategy are included in **Section 6**: **Appendices**.

These proposed solutions focus on the main floor of the Central Library. It is important to note that the lower and upper levels of the Central Library also deserve and require future improvements, and we encourage ongoing City attention to those needs in future phases. Bringing the Central Library in line with level of service standards for facility size will be part of a longer-term planning process with a separate and updated programming study.

Thank you for the opportunity to work with city and library leaders to identify ways to support and strengthen Bellingham Public Library services today and in the future through improvements to the Central Library facility. We are enthusiastic about the options available within the Central Library to support the library's mission and strategic goals.

Principal

Brad Cornwell, AIA

BELLINGHAM PUBLIC LIBRARY

Space Planning & Project Estimating Project Charter

Project Summary: Develop a list of discreet projects within the Central Library to improve functionality and efficiency of existing library spaces to improve library user experiences and staff operations. Projects will include conceptual plans and preliminary cost estimates.

Background: The Central Library is outdated for today's library services and is undersized for the demonstrated use and needs of the Bellingham community. The BPL Board of Trustees and Library Management are looking for areas within the existing building that can be feasibly renovated or retrofitted to meet current demands and operations. Proposed projects should consider the possible future expansion of the Central Library.

Outline of Work: In consultation with the Board of Trustees Facilities Committee and the Library Management Team, the architect is expected to do the following.

- Discuss with library representatives programmatic projects and their feasibility, including but not limited to, and listed in no particular order:
 - Installation of an automated book sorting system and general improvement for the materials flow process;
 - Staff work areas, including plans for additional staff;
 - Development of quiet areas for library users;
 - o Implementation of a computer lab for public use;
 - Teen use area;
 - Lecture room & other meeting spaces;
 - o Other.
- Develop conceptual plans and preliminary cost estimates for proposed projects.
- Assist library representatives with developing a list of building constraints that affect both library visitors and library staff—e.g., HVAC and Indoor Air Quality, lack of a main floor restroom; ADA accessibility problems; safety concerns; etc. The library wishes to make these concerns more visible to city officials.

Schedule: The Library hopes to have some sort of information available to submit for budget proposals for the city's 2019-2020 biennial budget.

Contact: Rick Osen, Chair, BPL Board of Trustees, rosen@cob.org, 360-734-8577.

Bethany Hoglund, BPL Acting Library Director, bhoglund@cob.org, 360-778-7263

Bellingham Public Library Strategic Plan

READ: Inspire Bellingham to read, view, and listen.

- Goal 1: Bellingham Public Library is everyone's favorite place to borrow books, films, and music, with help from knowledgeable, friendly staff.
- Goal 2: Enhance reading, viewing, and listening opportunities through broadened library partnerships, programs, and promotions.

LEARN: Promote Lifelong Learning from birth through adulthood.

- Goal 1: Establish Bellingham Public Library as the leading community center for Early Learning, where families read, play, and learn together.
- Goal 2: Inform and delight our community with a varied calendar of programs.
- Goal 3: Increase personalized services to meet individual needs for research, information, reading suggestions, and technology assistance.

MEET: Create thriving spaces where the community connects, accesses library resources, and shares their stories.

- Goal 1: Improve public access to library services by increasing library open hours to meet community demand.
- Goal 2: Optimize the public's ability to use the library 24/7 by enhancing our full-service, interactive virtual branch.
- Goal 3: Replace the 62-year-old Central Library, the hub which supports the entire Bellingham Public Library system, so that we may better serve our community.
- Goal 4: Ensure the city completes the seismic retrofit and historic renovations at the Fairhaven Branch Library.
- Goal 5: Meet community demand for convenient library services by exploring options to provide additional library service outlets within the city.

DISCOVER: Provide library collections that introduce ideas, build skills, support lifelong learning, and spark creativity.

- Goal 1: Offer the community a greater number and variety of library materials by increasing the materials budget to achieve the recommended library guideline of 15% of the Library's total budget.
- Goal 2: Increase the quantity of library materials in new and emerging formats.
- Goal 3: Provide public access to unique local content through digitizing local collections and promote access to other digital collections.

BELLINGHAM PUBLIC LIBRARY GUIDING PRINCIPLES

Public Spaces

Our public spaces are welcoming and available to all who follow our Rules of Conduct

Our public spaces have areas for individual and collaborative use

Our public spaces have good sightlines

Our public spaces have restrooms on all floors

Our public spaces have areas for book and art display

Our public spaces have updated technology and wiring

Our public spaces are accessible

Our public spaces follow all local/state/federal laws

Our public spaces are comfortable

Our public spaces are easy to navigate

Our public spaces give care to first impressions

Our public spaces are flexible to adjust to the changing needs of library service

Our public spaces are both reflective of our community and aspirational for our community

Staff Spaces

All staff have the space they need to perform their work responsibilities

All staff have a guiet and private place to take a break

All staff have some space for work related items

All staff have access to collaborative work spaces

All staff have a safe, healthy and secure work space

All managers have spaces that are safe and private.

We are good stewards of public funds by creating efficiencies in our spaces and work

Level of Service Standards -- Bellingham Public Library

June 1, 2018

From 2015 to 2018 the Bellingham Public Library (BPL) Board of Trustees has worked with library management to develop a series of Level of Service (LOS) standards in order to evaluate and determine how resources dedicated to the library measure up in regards to community needs and expectations. LOS standards were established in four major areas of library services:

- Library facilities—square footage per capita;
- Open hours per week for the Central Library and for the library branches;
- Library materials—expenditures per capita;
- Library staffing in FTE.

To develop these standards, peer libraries across the nation and libraries within the state of Washington were used as benchmarks. Comparisons with these libraries confirmed that BPL has a higher level of usage than the vast majority of these other libraries. This demonstrated use and demand from the local community also factored into the development of these LOS standards.

Each standard identifies three levels of service:

- 1. Low or minimal needed to provide the most basic of library services;
- 2. Medium or operational allows the library to provide all needed services;
- 3. High or optimal allows the library to enhance services.

In 2017, BPL and the City of Bellingham initiated a sustainability funding study for the library's future. The consulting firm BERK was hired to conduct the study and produce a report—
"Bellingham Public Library Services and Funding Models Study", published December, 2017. On November 13, 2017, BERK presented findings from the report to the Bellingham City Council.

At that meeting the City Council voted unanimously on the motion "...moved to direct the Administration to give recommendations to the Library Board of Trustees to move forward to Goal 2 (i.e., medium/operational) or 3 (i.e., high/optimal) as a priority."

At the beginning of 2018, BPL is operating below the low/minimal standards for staffing, at the low/minimal standards of open hours for the central library and the branches, and slightly above the low/minimal standard for materials facilities¹. Upcoming budget requests will directly tie to a plan to attain the medium/operational standards over time. The standards listed on the following table are meant to represent an integrated approach to library services that need to be assessed and implemented in conjunction with each other.

¹ Facilities square footage includes the large auditorium and two basement meeting rooms at the Fairhaven branch, none of which is actively used for library programs or services. Subtracting this space would place library facilities below the low/minimal standard.

BPL Level of Service Standards

<u>Standard</u>	Date of Adoption	Low/ <u>Minimal</u>	Medium/ Operational	High/ <u>Optimal</u>	Current <u>6/1/2018</u>
Library Facilities square ft./capita	1/19/2016	0.6 sf/cap	0.8 sf/cap	1.0 sf/cap	0.65 sf/cap
Open hours per week Central Library	6/21/2016	56 hr/wk	64 hr/wk	68 hr/wk	56 hr/wk
Open hours per week Branch Libraries	6/21/2016	28 hr/wk	36 hr/wk	40 hr/wk	28 hr/wk
Library Materials Expenditures per capita	3/21/2017	\$5.00/cap	\$7.50/cap	\$10.00/cap	\$5.50/cap
Library Staff FTE	3/13/2018	50 FTE	58 FTE	64 FTE	46 FTE

There are several factors to take into account when applying these standards to BPL's services.

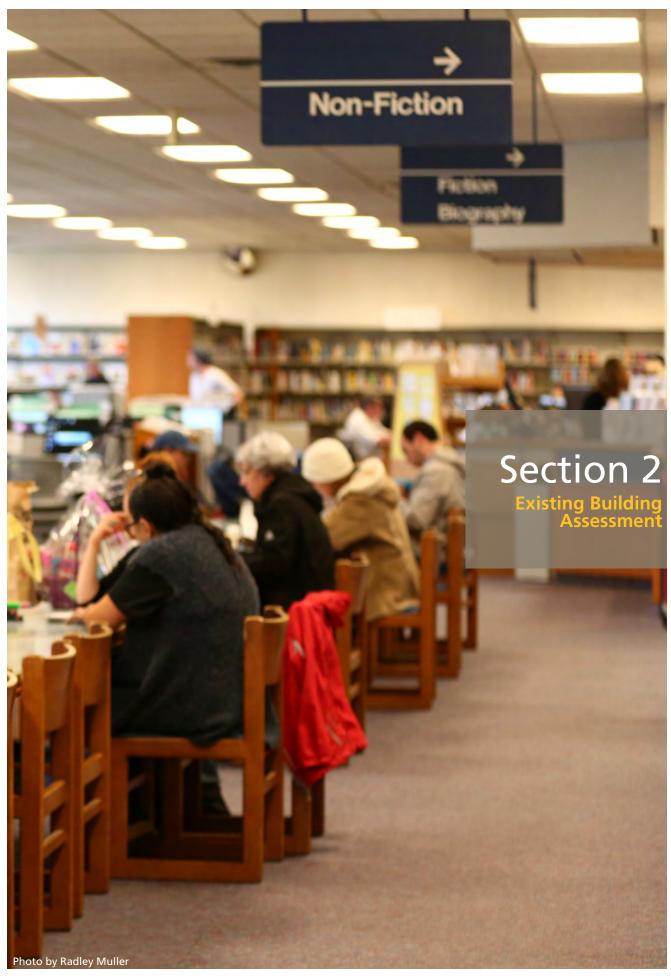

- The standards are not meant to be addressed independently from each other. E.g., it is unrealistic to reach the medium/operational level of open library hours while operating at the low/minimal level of staffing FTE.
- The three levels within each standard are reference points within a continuum, or sliding scale. It is not expected that an increase from the low/minimum level to a higher level would happen in one fell swoop. Rather, that gain would be attained in incremental steps.
- The standards should be reviewed periodically by the BPL Board of Trustees to determine that they are still an accurate representation. A partial list of issues that should be examined when standards reviews are conducted include:
 - Levels of community use, such as volume of circulation, number of library visits, and program needs and participation;
 - Amount of open hours and number of library branches;
 - Library materials data---size and age of collections, holds ratios, turnover rate, etc.:
 - Implementation of new technologies and their effects on library services, staffing and space.
- The one standard that is very difficult to address incrementally is the library facilities standard. A significant addition of library facility square footage can happen only through a major project. However, there are small steps that can be taken to address facility needs, such as renovating existing space to make it functionally better and to utilize other community spaces for outreach services.

Bellingham Public Library Central Library City of Bellingham

BPL Services and Funding Models Study By BERK December 2017

As part of the City's financial analysis and funding trends, BPL undertook a study to assess balancing the desired Level of Service (LOS) with options for sustained operating resources (not new one-time capital expenditures). Part of the analysis studied an option (from the 2009 Annexation with WCLS Report) for annexation, while 3 other options studied a Low, Medium, or High (to Optimal) LOS. A Medium or Better level of service is the model the Library seeks to deliver.

The study prompted conclusions that the disadvantages of a merger with WCLS outweighed the advantages of consolidation. In addition, the capacity and control of delivering a higher LOS would be enhanced by remaining a municipal library. Financing of desired Branch improvements, such as the seismic upgrade at the Fairhaven Branch and addressing major system improvements or expansions at the Central Branch remain challenges for the future.

Study recommendations were reviewed and presented to the Bellingham City Council on November 13, 2017. Council members Barker and Murphy moved to direct the Administration to give the Library Board of Trustees a recommendation to move forward with LOS Goals 2 or 3 as a priority. Motion was carried 6 – 0, with one absence.

Bellingham Public Library Central Library Critical Conditions City of Bellingham

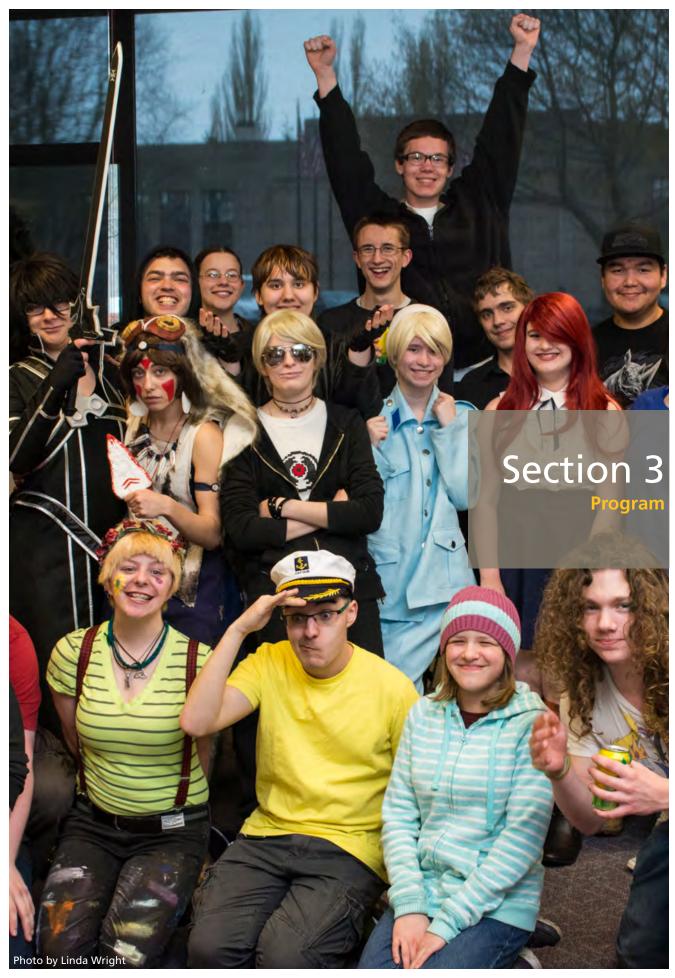

The City of Bellingham maintains through the PW Facilities Department an inventory of building system life cycle replacements and upgrades, with conditions ranging from "adequate" to "critical." A number of current "critical rated" systems that directly affect both staff working conditions and public perception and health include:

- Emergency Generator Renewal
- Upgrade of the Fire Alarm System
- Replacement/upgrade of Building HVAC System for compliance with current WSEC Air Changes and better Zoning/Comfort capacities
- Drinking Fountain Replacement
- Finishes throughout the 3 levels
- Some compromised Window Systems

This Space Planning Study does not address these issues with the exception of finishes at the Main Level and minor modifications to existing systems.

Should an expansion to the current Central Library be undertaken, the existing life safety, egress and HVAC systems along with primary electrical service (MD Panel) will either be required or recommended to be upgraded to meet current Building Codes.

PROGRAMMING

RMC met with key stakeholders, Trustee Liaison Rick Osen, Interim Director Hoglund, and Director Judd multiple times, initiating in July of 2018, to listen, identify project goals, develop space needs, understand LOS staffing, growth impacts and to ultimately develop remodel options for team consideration. Key meetings included:

- July 5, 2018 Site Tour and Initial Download
- July 12, 2018 L3 Priorities, Operation Insights, Staffing and "Pinch Points"
- July 20, 2018 Internal Philosophy and Staff Work Areas
- August 2, 2018 Initial Program Confirmation, (E) Space Analysis, and Confirmation
- August 6, 2018 Concept Options A D tested with bubble diagrams for Public, Staff & Circulation.
- August 13, 2018 Judd/Osen input for budgeting and 4 scenario outline directive
- August 21, 2018 Cornwell attended BPL monthly Public Trustee meeting and gave update
 of process and presented 4 scenarios.
- August 29, 2018 Judd/Osen Budget Scenarios
- September 7, 2018 Draft Budget & Scope graphic refinement
- September 11, 2018 Review of Phased Options A1 to A3, B1 + B2, and C1.

From the insights and aspirations received, RMC developed the attached program which checked multiple space needs against an "ideal" program. The "ideal" program was developed using several nationally recognized library planning standards, including:

- Public Library Space Needs: A planning outline 2009 by Anders C. Dahlgren; published by the Wisconsin Department of Public Instruction.
- Whole Building Design Guide for Educational Facilities (WBDG) (2017), Public Library Space Planning (a reference program by the National Institute of Building Sciences).
- The Connecticut State Library, Library Space Planning Guide, 2014 edition (with worksheet).

The program was then vetted against the 2017 Level of Service Standards approved by the BPL Trustees, with Level 2-Medium or Level 3-Optimal as the intended Basis for space planning needs.

The "ideal" standards were then compared to the 2018 BPL Central Branch Existing Conditions, as well as against projections reflecting increasing City Population growth for both 2020 and 2030.

Several key observations were noted:

- The existing Central Library is inefficient with its current square footage layout as the upper level cannot readily be utilized for collections accessed by the Public. The existing original closed stack area also both precludes public use and impairs space planning flexibility. Thus while seeming to be adequately sized for the current service population area, latent building conditions are precluding achieving the proper ratios of collections, assembly areas, and staff areas near collections.
- For an expected 2020 population, the existing facility is deficient for the public access and meeting spaces. Note that the population numbers used, do <u>not</u> reflect inbound County resident use by commuters, which makes the existing conditions even more deficient.
- In a future project the current staff area at the Upper Level should be reconfigured to better support staff collaborative configurations to meet LOS Goals and Standards.
- Lack of Main Floor Restroom and Indoor Air Quality issues remain challenges for both the Public and the Staff.

DESIGN STRATEGY

This space planning effort had the directive of both taking a long term view of future library space needs <u>and</u> crafting a strategy for implementing key short term-interim projects to increase staff efficiencies, improve public service, increase security and enable change with collections as needed.

One specific "shorter term" project goal was to find the best location for installing a new book sorting machine (10-14 bin size) to enable better sorting efficiencies and processing/delivery work flow.

An intentional, sequential phased process for short term building remodel improvements was requested and RMC folded this directive into crafting several divergent options, one of which studied a two-story building expansion to the east to best accommodate both short and longer term space needs. Multiple interior space plan possibilities were studied to both inform staff collaboration and to enhance the Publics' clarity, access to collections, and to provide flexible options for assembly. The Stakeholder Team recommended concentrating resources at the Main Level to best maximize service improvements to the Public. Through a collaborative process, the recommended, six part "phasable" space plan enables either incremental projects, or larger combinations of several components together.

Projects A-1/A-2

BPL is planning to install a sorter in the next biennial budget period – 2019-2020. Project A-1 creates space for the new sorter and repurposes the area adjacent to the garage, and in combination with Project A-2, improves the process flow of material coming into the library. In A-2 the current garage is modified into a receiving area. Materials incoming from WCLS will be offloaded in the receiving area and moved directly to the sorter. The internal book/materials drop is moved as indicated as part of A-1. This will improve the overall incoming materials handling efficiency.

Project A-3

The current Teen Area is in the back NW corner of the library. Moving the teens to a better location frees up that corner for a staff area. This will consolidate the staff space scattered around the floor and make for a more efficient arrangement.

Project B-1

As a result of Project A-3, B-1 indicates the relocation of the teen area and those collections in the NW corner, and the relocation of the magazines/periodicals from the new teen location in the NE corner.

Project B-2

Moving the current indoor book drop and sorting area creates space for an additional public conference room and two small work areas.

Project C-1

The new receiving/sorting arrangement will open up area C-1 allowing for better direct access to the fiction/non-fiction stacks.

Project C-2

Moving the staff offices/areas to the NW corner opens up area C-2. This will allow reorganizing of the checkout area and open up the sightlines in that area.

Scope of Work

Project Scope Description

The project consists of the interior renovation to the main floor of the Bellingham Public Library, central branch within the following areas: A1: sorting/processing, A2: distribution, A3: staff space, B1: relocated reading areas, B2: multi-use conference room, C1: new horizontal access and C2: new collections. FF&E to be provided by owner.

Project Design

Concept Design drawings dated September 11, 2018 including existing conditions and remodel areas.

Procurement

The costs provided herein are based on the assumption that the project will be delivered as design bid build with the potential of different contractors for each project.

Site Conditions and Constraints

It is expected that the work will be performed during regular working hours.

Basis of Estimate

Assumptions and Clarifications

This estimate is based on the following assumptions and clarifications:

- 1 Hazardous materials abatement is not anticipated
- 2 The majority of work will be performed during regular business hours
- 3 Projects are considered separate with potentially different contractors
- 4 There is potential that costs would be reduced if all projects were combined
- 5 Excludes owner's soft costs including permits, A/E fees, jurisdiction fees and owner's contingency

Message

Site Tour of Main / Central Branch 8:30 AM, Thursday, 5 July 2018

Attendees Jen

Beth Bethany Jim Rick

Jon McConnel

Main - Materials

 1.6 million items, manually processed crates full, pinch-point

Materials sorter

- modular

Have distributed services in nooks and crannies

Process is separated -3 vendor proposals

A – Actual Need

B - What can Fit

Cart Staging in public circulation area

Message (continued)

Staff / Break - SM

Poor separation between Jen and public Improve public to staff separation

Self service took boundary away

Space for staff needs materials

Not space available for private conversations, too few doors

Screen area, phones

Multiple renovations have left spaces in limbo

Public

Poor wayfinding
Poor acoustics
Skill share – collaborative, seating
No power outlets for public use far too few
In floor hydronic heating, caution
Need more seating

1984 // 1950

Help Desk

Reference and service Improve staff location

Adjacent to the public computer Staff can see computers

Visibility

Previous projects haven't had consultant plan assistance

Previous use has been on the fly and on the cheap.

Wifi bars with power strips

Help Desk feelings of vulnerability

Lack of boundaries

Cash drawer, must be staffed

Circle

Only one locking cupboard.

Priority balance between

Magazines and teen space
Reduce size, has opportunity for condensing
Important to public, seating
Special shelving is an impediment

Most popular up front

Browse on line to holds 25% of checkouts are holds

Public computers ideal, separate room for noise separation, enable classes Power from above works Remove sign for Reference Flexibility in wayfinding and signage

Oversized (24") non-fiction and non-fiction (18") are separated so subjects are in two places which causes confusion.

Co-locating would fix

Structural Capacity is a major factor in relocating collections

Film microfiche, magnifier

Low usage, mixed messaging
Re-filing is a concern, done by staff
Herald back issues, license is owned by McClatchey; \$ to scan.
Adjacency of equipment to help desk
Link to small collections

TEEN 12-18 yrs

Bethany

Teen space is an embarrassment to the community Protected, welcoming and comfortable

Tech station

Listening

Noise Privacy / Separation

Enclosed with glass, need visual

More comfortable social space

Not enough power

Shelving is full, having to ask someone is a barrier

Self-Serve generation

General: need to maintain visibility as a service

Highly visible for small group study

Message (continued)

Outreach

Out to healthcare and assisted living

Proximity to truck and dock

Services big bins from collection boxes at Haggens.

Truck deliveries have to come through front because the truck doesn't fit! Whatcom 4x weekly block off front.

Front deliveries at morning causes a security risk

Large bins don't fit through the front.

Centralized Materials Delivery

Upper mezzanine – All Staff

Expand staffing

Offices with closed doors

Co-locate staff

Not located next to staff that are most beneficial

Undersized outside book drop

Piled on floor after a weekend

Bins are too small

No water, more frequent issues Some are patron related

Public works log of issues

Book Drop and circulation are crossing

Patron natural light space

Directors office and conference room adjacent

Poor separation

No privacy

Operable partition not sufficient acoustic or visual separation

Mendery

Work area / hall way circulation conflict

2 staff

Functions could be relocated

Interlibrary loan

Adjacency to loading dock for acquisitions

Some processing

Some mending

General Staff - Doug / Paul - IT

Not enough space for equipment/tools/materials +1 employee Secure space

Shared workstations
Everybody's junk storage
Designated spaces
Laminator should be with mendery
No collaborative space to meet. More open to work together
Collection services

Staff lounge/break needs definition
May be able to reduce number of carts, organize corral.
Something with nothing, holding on to materials.
"might need it piles"
Culture change

Positions

Closed Stacks Ceiling 7'-2" (86")

Circulation challenged Has done a lot of clean up.

Lower floor

Lounge – not fully used Smoking lounge – Storage, lactation room, poor acoustics

FOBPL

Adjacent to Elevator works

Crate overflow in Children's

Children's Staff area

3 in area behind circulation desk 3 out

Public works next week
Planning & brainstorming

RE:	Kickoff/Direction Meeting	Other:			
Message					
Meeting:	8:30am, 12 July 2018, Thursday BPL Conference Room				
Attending:	: Osen, McCabe, Hoglund, McConnel, Farley, Vander Ploeg, Johnston				
Absent:	Dir. Judd, Keller				

Items presented and reviewed include:

- 1. RMC presented Board with Bellingham Public Library current Mission and the "Berk 2017 Reports" staffing chart. It is understood the Mission Statement informs all planning decisions. For the staffing, BPL intends to add 12 staff to raise the Level of Service (LOS) staff to 90 with also facilitating housing (2) City I.T. staff. Anticipated asks are reflected in the attached "Berk" chart.
- 2. RMC presented (3) 36x24 Floor Plans with associated Program Areas shown in color. A summary of these areas was additionally verbally reviewed and later shared and is attached. Current staff heritage locates Supervisors near areas of supervision.

3. Upper Level:

- · Need more efficiency at staff work area
- (2) ADA toilet rooms have some coded deficiencies with today's clearances.
- How can Library better use the "newer" skylight area?
- Collection Services on this level ideally nearer to Collections
- Mendery is a currently disrupted space due to lack of enclosed hallway...
- Board Room adequately sized
- Staff needs window access Current A/C works well at this level.

4. Main Level

- The Core (former Circulation Desk/Work Area) is an impediment to open visual control and is <u>not</u> central to current building entry.
- Public Computer Use declining but adequately sized. Enclosure with visibility would be ideal.
- Smaller glassed-in/visible small group or tutoring rooms would allow flexible programming.
- Can there/should there be public toilet rooms at this level?
- Fiction and Non-Fiction and Oversize Collections might be able to reduce in size.
- Foreign Language/Basic Education could move.

Message (continued)

- Whatcom Historical Society could move.
- Teen space remote and awkwardly accessed by young persons. Needs more visual control.
- Garage barely houses van.
- 10 parking stalls exist.
- RMC to verify side yard dimensions.
- Trend is for mobile devices v. fixed computer stations—currently no security devices for electronics.
- "Book sale" is well-positioned.
- Major issues with flow-Book Drop/Materials Distribution
- Maintain the windows!
- Explore a new vertical (N/S) staff layout and horizontal (E/W) layout.

Lower Level

- Story Time works well as Accessory Interactive Space.
- No size issues raised with Children's Library Collection.
- Could the Lecture Room be subdividable? Explore.
- · Current Conference Room used for tutoring.
- Program change of Lecture Room for scheduling for City/Library functions.
- Corner of Elevator Lobby is inefficient
- F.O.B.P.L. have a lot of storage.
 - o Access through Children's is awkward.
- Need Bargaining Agreement nursing space.
- Lunch Room/Lounge adequately sized.
- Verify if toilets are ADA compliant.
- 6. RMC to revisit spaces for more accurate measuring to refine existing SFs.
- 7. Next Meeting: 3:30pm Thursday, August 2, 2018 at Bellingham Public Library Conference Room

Space Planning DRAFT
Philosophy and Staff workstation needs
Drafted July 20, 2018. M-Team.
Shared with staff/input collect July 26, 2018

WS = workstation

Service Philosophy

- As much space dedicated to public use as possible.
- Because library services are always changing, library spaces need to be flexible
- Library spaces need to be both reflective of our community and aspirational for our community
- Collaborative learning environments foster lifelong education and promote civic engagement
- Our spaces follow all local/state/federal laws

Space Philosophy

- All employees need some space for work related items
- We're willing to have smaller individual work stations if it means adding collaborative spaces in our work area
- Managers need spaces that are safe and private. Rooms with doors.
- A safe, healthy and secure work space is essential for all library employees
- We are good stewards of public funds by creating efficiencies in our spaces and work

	Scope of Remodel Components	Other:

Message

Library Component Revisions:

A1: Sorting and Processing - 1,149 SF

Demo: demo interior walls, door/frames, built-in casework and glazing at grid E - C; abate/demo (E) ceiling system, remove furniture by owner; demo (E) shelving (west) casework (north), remove relite & wall/gate at grid G/5

New:

- 3'-6"x7'-0" HM door at grid line 2
- Finishes (ACT, wall paint, base, carpet)
- Power distribution for equip./work stations
- Lighting/switching
- HVAC (size for A1 & A3 scope)
- 13 bin materials sorter (\$150,000 200,000 budget) FOIC
- Wall/HM door at materials returns (grid G/5)
- Material drop slots, signage
- Finishes (paint, base, carpet)
- (E) lighting/adjust (E) HVAC

A2: Distribution - 737 SF

Demo: remove (E) coiling door, remove (E) door and frame at grid line E

New:

- 4'x20' wide exterior steel framed canopy with TPO roofing
- Infill (E) recessed area with geofoam and top with 6" reinforced concrete slab and 8" west side retaining wall; provide 8 LF. PTD guard railing
- Install new coiling (10'-0"x8'-0") door
- Provide dock seal and trailer bumpers
- Provide new (3'-0"x7'-0") HM doors with auto opening button each side
- * Add Alternate: provide alum auto slider 6'-0" opening in lieu of HM
- Provide new HVAC ventilation
- Provide new lighting/switching

Message (continued)

A3: Staff - 826 SF

Demo: remove existing book shelves/furniture by Owner; abate/demo (E) ceiling system New:

- New interior walls and doors to new offices (120 SF/EA)
- New wall at grid 2: 8' high with tempered glass to top of (E) ceiling
- New HM door (3'-6"x7'-0") at grid 2
- (2) new workstations and partitions (64 SF and 100 SF)
- (3) shared 4' work stations
- New power distribution
- New lighting and switching
- Extend new HVAC from A1 within space
- New finishes (ACT, paint, base, carpet)

B1: Relocated Young Adult/Periodicals - 1,306 SF

Demo: relocate Periodicals to NW corner of library with seating; relocate Young Adults collection to new B1 location (NE corner of main floor); (E) furniture to be removed by Owner

New:

- New finishes (lighting, branding and seating)
- Install existing shelves to 2 or 3 tier shelving at (south) for visibility

B2: Multi-use Conference Room - 370 SF

Demo: remove (north) wall framing

New:

- Install new full height glass wall with two doors
- Add alternate study rooms; provide two full height glass enclosures
- New finishes (lighting, dedicated HVAC)
- New seating by Owner

C1: New Horizontal Access - 577 SF

Demo: remove wall/relite and wall/gate

New:

- create new horizontal access
- New finishes (lighting, flooring, base, ACT, paint)

Message (continued)

C2: New Collections - 654 SF

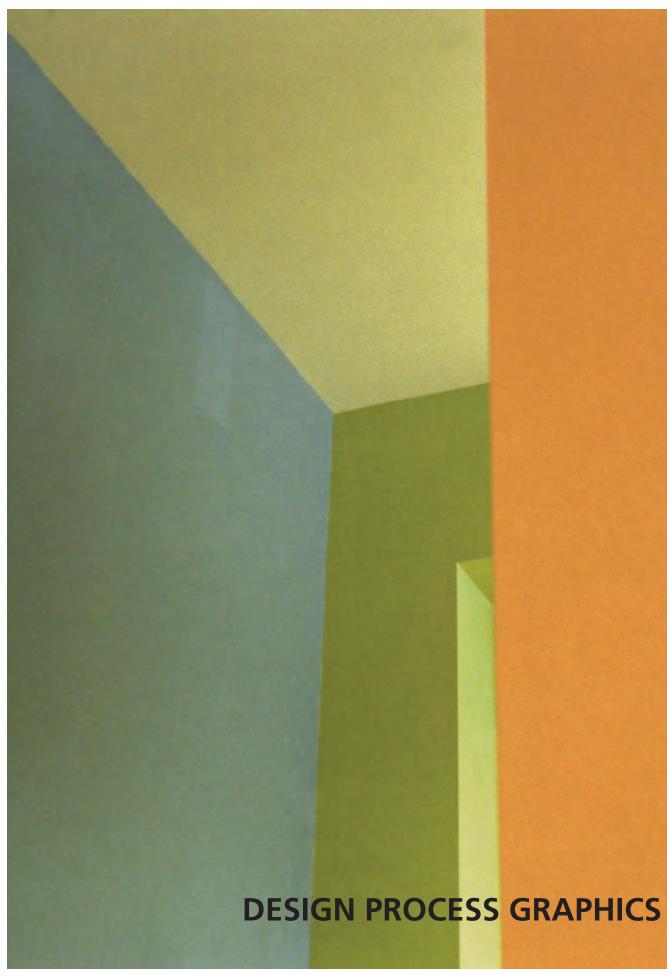

Demo: remove existing non-structural walls; doors and relites, abate/demo (E) lay-in ceiling systems

New:

- New finishes and lighting; adjust (E) HVAC
- Add alternate study room (new walls, doors and future glass enclosure)

Independent Scope (by BPL)

- Increase holds area at grid 8/9 C/D
- Relocate new collection to grid line E
- Relocate Large Print to north of grid line C
- Relocate Historical/Genealogical Collections

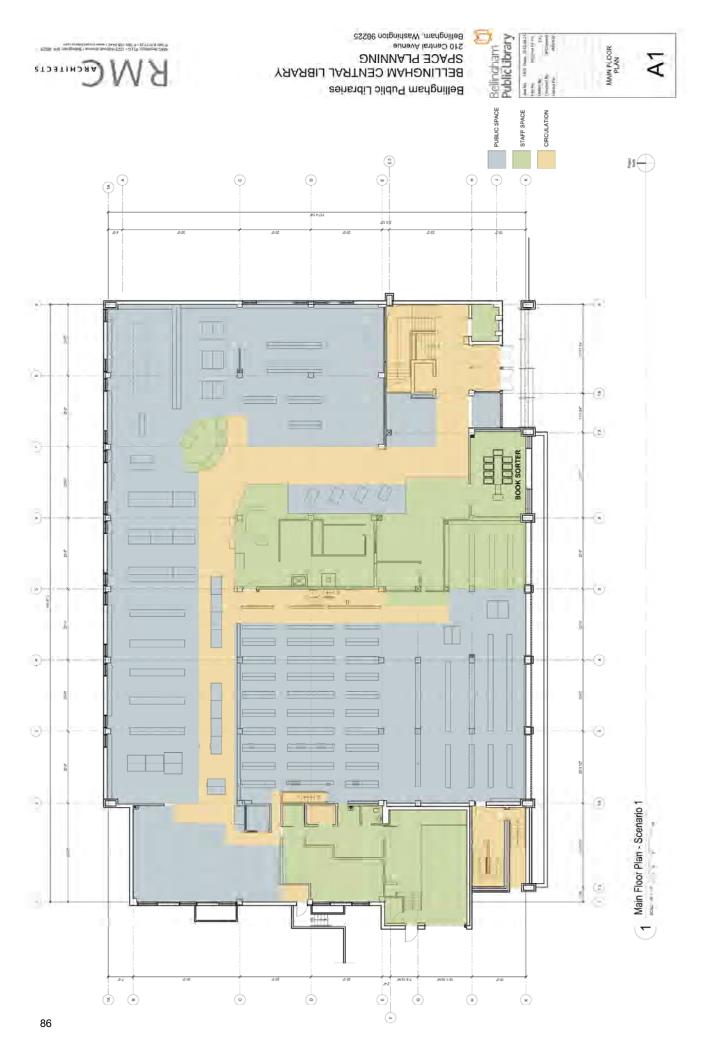

DESIGN PROCESS

RMC initially generated conceptual improvements to all three levels of the Central Library, including the option of a potential 2-story future addition to the east. With stakeholder team insight and focus, the design consolidated multi-floor optional planning efforts to the Main Level, as modifications at the Main Level both improves primary staff service efficiencies <u>and</u> maximizes the Publics' perception of "return." Accordingly, four primary scenarios were created: A1 to A4, each studying the ratios of Public Space, Staff Space and Circulation efficiencies.
